Professional Summary

Data-driven, naturally inquisitive professional with expertise in analytics, problem-solving, and business intelligence. Skilled in leveraging data science techniques and business acumen to optimize efficiency, drive strategic decision-making, and improve business processes. Proficient in Power BI, Python, and Excel for data analysis, visualization, and reporting. Adept at integrating data-driven insights into business operations to enhance performance and achieve strategic goals.

Education

The University of Texas at Austin

McCombs School of Business - Post Graduate Certificate in Data Science & Business Analytics

February 2025 | Remote | (GPA 4.33)

- Relevant Coursework: Intro to SQL, Business Statistics, Supervised Learning, Unsupervised Learning, Model Tuning, Generative AI, Python Foundations, Ensemble Techniques

Texas Tech University

Rawls College of Business - Bachelor of Business Administration in Supply Chain Logistics & Management

May 2020 | Lubbock, TX | Magna Cum Laude (GPA 3.87)

Work Experience

Dell Technologies - Cloud, Software, and Security Technical Sales Representative

January 2022 – Present | Remote

- Leveraging Power BI and Excel to analyze, qualify and clean customer data, identifying trends, and providing data-driven software recommendations for over 3,000 customers, resulting in \$11.6 Million in sales
- Optimizing sales process efficiency by creating, cleaning and analyzing Salesforce reports using PivotTables, VLOOKUP, Macros and other advanced Excel tools
- Collaborating with cross-functional teams both internally and externally to optimize customer outreach, internal operations processes and new sales initiatives
- Communicating quarterly account set related insights and predictions to management, requiring thorough analysis of customer, campaign, and attainment data

Redeemer Church - College Ministry Data & Operations Resident

August 2020 – January 2022 | Lubbock, TX

- Managed and analyzed data for over 1,500 stakeholders using HubSpot, Google Workspace, and Excel
- Developed structured data processes and dashboards to track engagement and fundraising
- Optimized reporting workflows, improving efficiency in decision-making and stakeholder communications

Data Science Projects*

Business Statistics - Determined the effectiveness of a new landing page for converting subscribers

Supervised Machine Learning: Regression - Created a dynamic pricing strategy for used phones

Supervised Machine Learning: Classification - Predicted booking cancellations with a decision tree model

Unsupervised Machine Learning - Created clustering models for grouping stocks based on characteristics

Model Tuning - Predicted machine failure on windmills to reduce costs and prevent downtime
